FIRST PRODUCTION: 1999

Crunch is a new kind of Leatherman made for the most demanding professional or do-it-yourselfer. It is the only folding tool on the market that offers locking pliers. All interior blades lock as well. Each opens individually, locks positively in place, and is unlocked

by a push-button mechanism. Crunch is full of surprises, like jaws that open to clamp on 1" diameter pipe and a 1/4" hex bit adapter built right into the end of one handle. And it all comes in a six-ounce tool that folds down to the same length as Leatherman's original PST.

Packaging

Crunch is sold in an attractive box or clamshell packaging.

Sheaths

Choice of rugged leather or durable nylon belt sheath is included.

Point of Purchase

Various point-of-sale materials are available to help display Leatherman tools and communicate their benefits.

25 YEAR GUARANTEE

100% STAINLESS STEEL

WARRANTY SERVICE

We proudly back our products with a 25-year guarantee (limited warranty) If you or your customer ever have a problem with a genuine Leatherman tool, we will make it right with prompt warranty service.

STEEL CHARACTERISTICS

Leatherman tools are made from 100% stainless steel to provide years of dependable service. Each 400-series stainless implement is heat treated to optimal hardness for its function. For example, our knives and files are typically tempered to Rockwell C 57-59 to achieve excellent edge retention. Our plier jaws and most screwdrivers have a Rockwell C hardness of 49-53 for better durability.

QUALITY STANDARDS

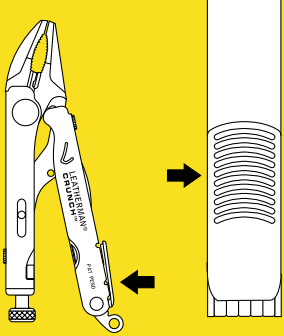

How is Leatherman quality better than the rest? Look at the sharp corners on our screwdrivers, built to ANSI specifications for strength and dimensions (which we verify with a laser micrometer). We regularly torture test our plier jaws; they are finished and riveted so precisely you can cut paper with the wire cutters. Even non-functional cosmetic flaws no bigger than a speck of pepper are not acceptable in any of the numerous inspections each tool must pass.

WHY BUY A LEATHERMAN?

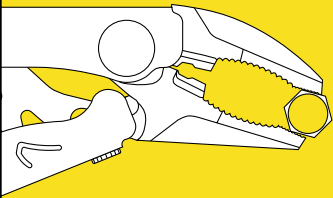

In 1975, Tim Leatherman (totally picky engineer) found himself traveling through Europe with a tight budget and a cranky car. His trusty scout knife just couldn't handle the job. Tim wished he had a compact knife with full-sized pliers. Back home, he put his engineering skills to work and after seven years (picky, picky, picky), the original Leatherman tool was perfected. Why should you buy a Leatherman? Tim's standards for quality, durability, precision and attention to detail are what make Leatherman tools like no others. Ever since Tim invented the category we've focused on just one thing - manufacturing the world's highest quality multi-purpose tools. We're not only the original, we're the world's leader. Put it to the test for yourself. You'll be pleased you bought a Leatherman.

COMPACT HIGH-TECH DESIGN

ALL BLADES LOCK

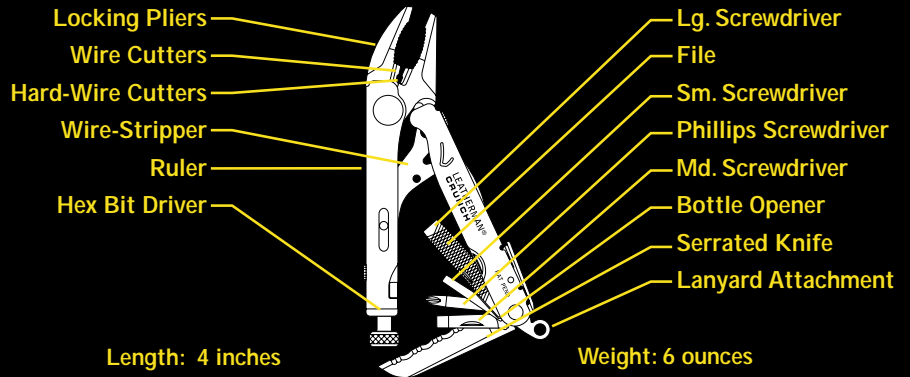

CLAMPS UP TO 1" DIAMETERS

THE DIFFERENCE

Locking pliers and locking blades! The Crunch offers both in a compact size with high-tech style.
